

As a 27 year broadcaster, I would like to express my high level of concern about this FCC action. I share with many many others the belief that this proposal would penalize the thousands of responsible broadcasters who have never had a complaint about their programming filed with the FCC, in an effort to target the few stations with controversial programming. The capital investment required to record and archive thousands of hours of broadcast time would be particularly burdensome on broadcasters operating in smaller markets.

Please work harder on improving AM Radio, and put more of your efforts on keeping Satellite Radio from doing illegal things with translators and such. I would also request you bring back the era with many operators owning a few stations not a few operators owning all of the stations.

I urge you to dump this silly idea, and let us get back to serving the public! Thank you.
